

**Marshall W. Nelson & Associates**

Process Heating and Control Engineering Since 1958

## CUSTOM FABRICATIONS

We believe that working with you to formulate a solution to meet your specific application requirements is what we do best. Customers trust our engineers, our 3D modeling designs and our manufacturing team to produce exceptional high-quality custom assemblies every time.

We help you review the application and provide guidance on the proper selection of components. We assist our clients on new state-of-the-art system designs or help them retrofit existing equipment for optimal performance and code compliance. We train your staff on how it interfaces with your burner management system.

A few of our custom gas valve train assemblies are demonstrated here:
