Process Heating and Control Engineering Since 1958

FIELD SERVICES

MAXIMIZE EFFICIENCY AND ENSURE SAFETY

Our experienced field technicians can assist you with burner system repairs, combustion system calibrations and training on how to make your existing operating processes more efficient. We are committed to helping you improve the safety, reliability, efficiency and emissions of your combustion equipment. In addition, we'll help you develop effective plans for maintenance solutions to optimize the performance of your combustion systems. We offer a full range of services.

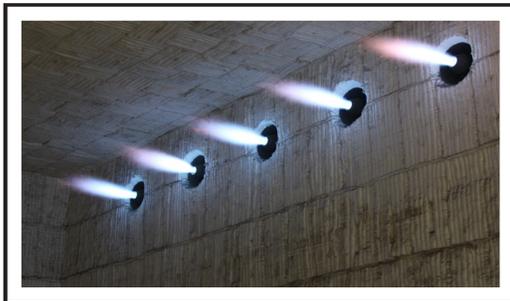

SERVICES OFFERED

- Burner Tuning
- Code Compliance Review
- Combustion Controls
- Combustion Efficient Testing
- System Troubleshooting
- Furnace Uniformity Testing
- System Balancing
- Preventative Maintenance
- PID Control Loop Tuning
- Safety Audits
- Safety Valve Leak Testing
- Temperature Control Calibrations

Regularly scheduled maintenance can avoid costly system failures, lost production time and keep you in compliance with NFPA 86 code standards. Becoming well-informed of safety issues, environmental and legislative regulations are also elements that could impact your daily operations. Our team will analyze your entire combustion system from the burner, to the gas valve train controls through the burner management system and provide you with expert recommendations.

Call us to prevent your plant facility combustion system from becoming a safety hazard.
